Why must select the inconvenience one if there is very easy? Obtain the profit by buying the book **Deadly Harvest By Leonard Goldberg** right here. You will obtain different means to make a deal and also get the book *Deadly Harvest By Leonard Goldberg* As recognized, nowadays. Soft documents of the books *Deadly Harvest By Leonard Goldberg* end up being very popular amongst the visitors. Are you one of them? And also below, we are offering you the extra compilation of ours, the *Deadly Harvest By Leonard Goldberg*.

From Library Journal

With her younger sister dying from an Ebola-like virus, top forensic pathologist Joanna Blalock is under enough stress. Then she is called in for an opinion on the murder of wealthy William Arthur Warren. As Blalock and Los Angeles Homicide Lieutenant Jack Sinclair begin to investigate, they discover that Warren's newly transplanted liver was diseased. In due course, the skeleton of another murdered man is found in the hills above Donors International, which provided Warren's new liver. Joanna consults on this case, too, and soon attracts the attention of the killers. Goldberg (*Deadly Care*, LJ 3/1/96) has a solid story but fails to allow enough time for character development and abruptly catapults the reader into a shockingly stark climax. However, as a professor at UCLA's Medical Center, he certainly knows how to bring authenticity to his novels. The Joanna Blalock series is a good one to hand to readers of Patricia Cornwell; this new addition is recommended for most fiction collections. ?Jo Ann Vicarel, Cleveland Heights-University Heights P.L., Ohio Copyright 1997 Reed Business Information, Inc.

From Booklist

In Goldberg's fourth medical thriller starring forensic pathologist Joanna Blalock, the devil is Donors International, a widespread organ-transplant company that harvests hearts, livers, and other organs from around the world to save the lives and health of those wealthy enough to pay its high prices. Memorial Hospital is the site of the unexplained deaths of two wealthy men who had received livers from DI. These livers become surrounded with cysts of unexplained origin, cysts that later serve as clues for the beautiful, quick-thinking Joanna. Jake Sinclair, a detective and Joanna's former lover, gets in the thick of the subsequent action, and a subplot involves Joanna's younger sister, Kate, an archaeologist brought back from a site in Guatemala with an almost fatal, unknown viral infection. Thanks to his clear style and storytelling ability, this is another bell ringer for Goldberg, who, teaching and practicing physician that he is, appends to his yarn a note pointing out how desperate the real organ-transplant situation currently is. William Beatty

From Kirkus Reviews

Tough police Lieutenant Jake Sinclair and pathologist Joanna Blalock (*Deadly Care*, 1996) team up again to excellent effect, tackling a tangled web of a case that pits them against both garden-variety murderers and predatory traffickers in human body parts. When heavy rainfall unearths a corpse buried ten years or more on a mountainside separating West Los Angeles from the San Fernando Valley, Jake catches the call. In need of forensic expertise, he appeals to his estranged lover Joanna for assistance. Despite troubles of her own, she agrees to help him on this and a recent killing that left a wealthy industrialist dead, apparently at the hands of a violence-prone intruder, in his Brentwood home. Although deeply concerned about the deteriorating health

of younger sister Kate (suffering from a viral affliction contracted while on an archaeological expedition in Central America) and an alarming incidence of organ transplant fatalities at Memorial Hospital (her professional base), Joanna bears up, providing Jake with valuable clues on the anonymous remains and slain millionaire (whose treacherous trophy widow is subsequently slaughtered along with a small-time actor in a cheap motel room). Kate's liver soon begins to fail, and the distraught Joanna must rely on a concern called Donors International to supply an immediate replacement. While a legal enterprise apparently operating within the law, uncommonly prosperous DI proves a decidedly secretive organization, one that may have, yes, skeletons in its closets. Jake and Joanna eventually pierce the corporate veil to expose the horrific for-profit endeavors of Donors International. Before doing so, however, they must do personal battle with a mob-connected surgeon, excessively entrepreneurial scientists, and a villainous physician who takes a decidedly broad view of the phrase ``homegrown." Shock value and more from Goldberg, a clinical professor at UCLA Medical Center who has the anatomy of ingenious murders down pat. -- Copyright ©1997, Kirkus Associates, LP. All rights reserved.

Entertaining, but a disquieting similarity...(spoilers)

By Mackie

I've just "discovered" the Joanna Blalok series, and I've been reading them pretty much one after the other. There was a sense of familiarity when I started *Deadly Harvest*: (spoilers)(spoilers) Joanna and Jake are once again split up, Joanna winds up in the hospital after someone tries to kill her, then she disappears from the hospital when someone tries to kill her again. I'm starting to worry about the poor woman's health; one more severe concussion may finally do her in. However, even with these complaints, the book is entertaining, the plot intense, the characters interesting. Just be prepared to think you might have already read this one. I did. It took several pages to realize the events were only slightly different from the last book in the series I'd read.

My favorite book of the series

By ~Beloved~

I've read the entire Joanna Blalock series and love it. She is an awesome character that you just can't get enough of. This book was my favorite because of the twist that comes in at the end, it took my by surprise and I love that! The ideas in some of the books are a little far fetched, but that's because it's fiction. Anyway, I loved the book and the series. I hope another book is on the way!

Don't ask question unless you want to really know the answer

By A Customer

Joanna Blalocks' world has fallen apart. A highly regarded doctor at Los Angeles' Memorial Hospital, she has just learned that her sister Kate, an archeologist at a Guatemala dig and her fifteen American compatriots caught a deadly disease. Twelve members of the party and several natives have since died from the unidentified virus that was apparently transmitted to the humans in a remote, primitive jungle area. Kate, lying in a coma, is taken to Memorial for treatment. When Kate arrives, Joanna is stunned by how sick her sibling is and how little she can do. Soon, it becomes obvious that Kate

will need a liver transplant to survive.

..... Joanna is desperate to find a match for Kate. She decides to utilize Donors International, a legitimate, profit-making company that has had great success in finding matches. Joanna has to hock the farm and still has to borrow money to pay for the organ transplant. However, Joanna specializes in forensic pathology and quickly realizes that the company's phenomenal track record in finding donors is because of its questionable sources. She not only has to deal with the moral dilemma of her sister's needs vs her medical ethics, but the fact that her own life may be in jeopardy because she knows too much.

..... In his fourth medical thriller, Dr. Leonard Goldberg moves to the head of the class as he paints an exciting chiller filled with interesting characters and a deadly brilliant story line. Move over Cook and Palmer, there is a new player on the block and his current tale, DEADLY HARVEST is well worth reading.

.....Harriet Klausner
