## Review

"Besides dazzling the eyes with hundreds of full-color photos, the book lists the best field guides for each region covered, provides contact information for local birding groups, and suggests when an organized tour might be a birder's best option. An excellent introduction to the world of birds outside North America,"  
–Book News, Inc.

## About the Author

Les Beletsky is a bird biologist and natural history writer. After receiving a Ph.D. in Biological Sciences in 1983, Les enjoyed a long post-doctoral career at the University of Washington in Seattle, conducting field research on the ecology and behavior of birds. It is on the internet publication establishment that give so many collections of the referred publications. So, merely with net link, you could enjoy downloading this publication Global Birding: Traveling The World In Search Of Birds By Les Beletsky and also numbers of publications that are searched for now. By seeing the link web page download that we have supplied, guide Global Birding: Traveling The World In Search Of Birds By Les Beletsky that you refer a lot can be located. Simply save the asked for publication downloaded and install then you can enjoy the book to review each time as well as place you desire.

# GLOBAL BIRDING: TRAVELING THE WORLD IN SEARCH OF BIRDS BY LES BELETSKY PDF

A general "how-to" book for international birding is absent. This unprecedented new book by top-selling author Les Beletsky (Birds of the World, Birdsongs) will aim to explain why birders are interested in going to other countries and where they like to go. It will act as a "bridge" for domestic birders, allowing them to build on their exciting new knowledge as beginner birders by accessing other countries to see species they cannot see at home. The book, in six chapters, will describe each continent with respect to birds and birding, and tell what kinds of birds birders seek out in those places, along with practical pointers on international birding contacts and field guides. Engaging sidebars throughout the book, tell short stories of birding adventures looking for special birds or unique birding locations.

Nice pictures, little else

By Brian Allen

I don't like to be the first negative reviewer on a book especially covering my favorite pastime, world birding. This book has a broad but very shallow sweep. The chapters are organized on sections such as Sub-Saharan Africa, Europe and the Middle East, Asia etc. The typical section has some general information such as how wonderful the safaris of Africa are and the birds are frosting on the cake, or Europe is great for birding but don't forget the opportunities for viewing the great cultural monuments. Unfortunately this is the

trite filling for many parts of this book. The sections have one or two boxes of more interesting information such as the authors' experience looking for the Buff-throated Dipper in South America. This is just enough to have you asking why there wasn't more specific information and description for the rest of the book.

I would have appreciated at least some maps showing the best sites and a list of good birding lodges and parks. One good aspect of the book is a list of species unique to each section but the sections again cover too much area (Europe and the Middle East together) and the species have only general habitat descriptions with little more information that would be useful such as specific locations, parks etc. where they could be found.

I received this book as a gift and was excited to have it but have not mentioned what a disappointing book it is to the very nice person that gave it to me. I am hoping for a much better update to this great idea for a book in the future.

Global Birding

By Brian H. Nordstrom

This book is published by National Geographic. The organization is by continent, with overviews of families of birds. The emphasis is on the most sought-after birds of each continent. The photography is beautiful. The book gives you a good feeling for how bird families are distributed around the world and how similar families occur on different continents. If you're birding overseas, it's a book worth looking at before you leave home, but don't take it with you on the plane--it's too heavy.

General lending collections will find this a specific, fine pick!

By Midwest Book Review

GLOBAL BIRDING: TRAVELING THE WORLD IN SEARCH OF BIRDS offers a fine, world-wide survey of birds and pairs lovely color photos with insights on birds of different environments, from mountains to prairies. Chapters divided by different countries of the world cover local birding opportunities, are specific in scope, and provide armchair naturalists and would-be travelers alike with fine insights into the natural history of each region. General lending collections will find this a specific, fine pick!
